

**PRODUCT LINE 2023**

**Direct Action® - experience based gear.**

Direct Action® was brought to life to utilize the experience and knowledge of our designers, who are experts in the area of modern military operations, and create the most advanced combat systems available on the market. Understanding the specific needs of elite special forces operators is not our biggest advantage though. We are proud to be able to transfer this experience to the outstanding production process that enables us to constantly improve. With meticulous manufacturing and rigorous quality control, we are sure to be leaving no room for error and nothing to chance.

We are determined to provide our customers with gear that may be compiled in a way that anyone can build a mission-specific set and fulfill his or her demands. We call it the "Individual-as-a-system" approach. It enables us to stay coherent and grow in an evolutionary way, consciously refusing to follow trendy gimmicks or beaten paths. It's the feedback our users provide us with and the insight of our experts, that lead us.

Proud of the fact that a great majority of our products are made in Poland from high-quality, genuine fabrics and hardware, using advanced proprietary laminate and utilizing patented designs, we go by the bare-bones and straight motto:

#GoLoud!

**Developer disclaimer:** Due to constant professional input and testing some product details in this catalog may differ from the final product. Thank you for understanding.

## RESPECT REAL LEGENDS

Being so closely related to polish special forces, it's completely natural for us to commemorate some of the greatest men in the history of our military. Right from the beginning, Direct Action's main products are named after the great fighters used by Polish war heroes, some of whom were members of the glorious "Dywizjon 303". We hope that these references will bridge the gap between these brave men and today's users, proving that real values, like honor and dedication, are timeless.

@ Crown Copyright, IWM

## MEET THE TEAM

The greatest strength of the DIRECT ACTION® brand is that it's conceived and built from the experience and knowledge of true professional users. Our whole team is built around Special Forces veterans, shooters, shooting instructors and designers with years of experience behind them. We not only design and build the gear, we understand it, because we actually use it. Each product is designed for a specific task. Each part is carefully chosen to be the best of the best. We put each product through multiple phases of testing. Thanks to this, we are fully confident in every product we create. We never stop working on improving our gear, so that the best of the best can get the equipment they deserve.

The base for building the whole system, our innovative and light-weight plate carriers, chest rigs, belts and panels were designed to provide as much comfort and freedom of movement as possible, combining a lightweight form with maximum modularity. Our system based gear has resulted in interchangeable components for many of our products.

# BEARCAT®

## plate carrier

Product SKU: **PC-BRCT-NLN**

Our new, completely redesigned approach to the plate carrier idea, the BEARCAT® is minimalistic and lightweight, but still a versatile plate carrier made of 4-way elastic nylon. It keeps the plate stable even during dynamic movements, and the skeletonized, laser-cut modular system on the chest area allows you to attach small pouches and stabilize PTT's. Under the laminate panels on chest area there are ITW Nexus GTSR® buckles for mounting additional flaps and chest rigs.

The flat, low-profile shoulder straps with tunnels allows you to conveniently place the cable of the quick-release system. They also have elastic loops for other cables, antennas and a hydration tube. In addition, there are elastic loops on the sides of the front plate bag to stabilize cables or antennas when the radio is carried in a comms wing. In the upper part of the back plate bag there is a minimalistic skeletonized modular system and an integrated drag handle.

On the sides, there are zippers that allow the assembly of back panels, including those from the SPITFIRE® system. In order to minimize the weight, the back of this platform is uncovered and without any accessory Velcro®. The plate itself also has no additional admin pockets. The set does not include a flap or a cummerbund (you need to purchase them separately). BEARCAT® Ultralight Plate Carrier is compatible with most of the SPITFIRE® System Accessories.

# SPITFIRE®

## plate carrier

Product SKU: PC-SPTF-CD5

Taking its name from a famous WWII fighter, our SPITFIRE® plate carrier is a streamlined and dynamic platform. Lightweight and non-restricting, this plate carrier is one of the lightest in its class.

The SPITFIRE® is a durable platform, unique in its modularity - converting to a cut-away rig in just a few simple steps. Made mainly of proprietary laminate and some 500D Cordura® fabric, it will withstand even the hardest conditions. The whole surface of the carrier is covered with a laser cut modular system that is compatible with MOLLE/PALS. As mentioned before, the SPITFIRE® is truly a modular platform - therefore you are able to change the cummerbund, front flap, or add a zip-on panel to the back.

Additionally, thanks to the front buckles, you can attach one of our chest rigs or several other rigs available on the market within a few seconds. Front zippered pocket on the chest area will fit small essentials like spare batteries, ear plugs, target photos etc. Velcro® loop panels on front and back allows you to personalize your carrier with patches. Additionally, the carrier is equipped with numerous loops to stabilize your cables, antennas, hydration tubes, as well as two PTT anchor points on the front.

# SPITFIRE® MK II

## plate carrier

Product SKU: **PC-SPT2-CD5**

When it comes to modern tactical equipment, those not going forward are actually going backwards. We, at Direct Action®, are focused on the constant evolution of our products. Thanks to the feedback from users around the world, we were able to create the new, improved version of one of our top products – the SPITFIRE MK II Plate Carrier®.

The MK II version may look simpler, but in fact it is much more scalable and mission configurable than its predecessor. We've decided to strip down the carrier of unnecessary PALS slots under the flap and on the back as well as enlarging the loop panel on the front for those large LE patches. Even more – we've made it even lighter than the standard version. The SPITFIRE MK II® is made of a combination of proprietary laminate and Cordura® 500D, which make it lightweight but at the same time, extremely durable.

This plate carrier is equipped with a minimalistic modular system on front and back. Thanks to numerous new flaps, back panels and cummerbunds you are able to make the carrier the way you actually need it. As a standard, the SPITFIRE MK II® is equipped with a minimalistic, non modular, elastic cummerbund that will keep both panels together even during dynamic movement. This plate carrier is compatible with all classic SPITFIRE® accessories like Comfort Pad Set or Cutaway System.

## THE DIFFERENCES

### between plate carriers

DIRECT ACTION® is all about improving our products, so that they can become better and better. This is why, we've decided to create a new version of one of our core products - the SPITFIRE® plate carrier. But even though the new, MK II model is already available, we've also decided not to get rid of the basic one, so that everyone would be able to choose the carrier most suitable for them. The most important thing with the MK II is that this time, you build a carrier basically from scratch, making it almost fully personalized. The bigger base modularity of the SPITFIRE® MK II is not the only difference comparing to the "classic" one. Take a moment to check them all on the next page.

## Spitfire®

- Larger top Velcro® panel
- No MOLLE/PALS slits under the flap and on the cummerbund
- No front flap in the basic setup

- Lightweight, elastic cummerbund instead of the large, modular one
- Overall lighter construction

- No MOLLE/PALS on the back
- No additional flap covering adjusting system

## Spitfire® MK II

# HELLCAT®

## low vis plate carrier

Product SKU: **PC-HLCT-CD5**

A slick, low visibility, low profile, yet durable plate carrier designed to be used either under your jacket or as an outer ballistic vest.

This is a lightweight platform, with limited modularity. It features a fully elastic cummerbund with integrated carbine mags pouches and a radio pocket on each side, as well as a front flap with three elastic pouches for carbine/smg/pistol mags. The slick construction is perfect for CQB use, with almost no loose parts that can be snagged within the environment. Large Velcro® panel on the front and back for unit ID patches. The carrier is made mainly of Cordura® 500D and proprietary laminate for enhanced durability.

The HELLCAT® is perfect whenever you want to run a lower profile, but also want to have the availability to have some more firepower at hand. HELLCAT® plate carrier is compatible with some of the accessories form the SPITFIRE® system, including flaps or cummerbunds. Due to the buckles on front, the HELLCAT® is also compatible with most of our chest rigs.

# CORSAIR®

## low profile plate carrier

Product SKU: PC-CRSR-NLN

The CORSAIR® low profile plate carrier is a lightweight, slick and easily concealable hard ballistic vest. This simple plate carrier was designed to be worn under your clothing without any additional Velcro® panels, flaps, or any modularity.

The CORSAIR® features a fully elastic cummerbund with inner carbine/ pistol mag pockets. It's made entirely of elastic nylon fabric to tightly fit different types of plates, without any unnecessary bulky stitching. This enables it to be concealed under your jacket or even a shirt without the risk of excessive printing.

Made only in solid colors to blend even more with your everyday clothing – perfect for undercover or covert operations requiring hard ballistic protection (III, III+ to IV standalone). The plate carrier fits most of the popular plate shapes including SAPI/ESAPI, Swimmer or Shooter Cut.

## SKELETONIZED

## cummerbund slim

Product SKU: **PC-SKCS-CD5**

The Skeletonized Cumberbund Slim is a minimalistic and light cummerbund, mounted to the front Velcro® panel of a plate carrier.

Thanks to the use of ROC® 40 mm buckles, you will not have to open the front flap every time you put on or take off your plate carrier. Almost the entire surface is covered with a laser cut modular system, compatible with MOLLE/PALS. The partially elastic back provides extra freedom of movement.

## SKELETONIZED

## cummerbund wide

Product SKU: **PC-SKCW-NLN**

The Skeltonized Cumberbund Wide is made of four-way stretch nylon and laminate.

The laser cut laminate on the surface makes the cummerbund extremely light and compatible with the MOLLE/PALS system. It will work with most Direct Action® plate carriers, including the BEARCAT® Ultralight Plate Carrier. The 4-way elastic part works as an additional pocket for flat objects or for hard and soft ballistic panels.

Two polyethylene stiffeners are included to provide rigidity when the cummerbund is not used with a ballistic inserts. The Skeletonized Cumberbund Wide is closed with 80 mm ROC® buckles, that are silent, reliable and easy to use. The semi-elastic design gives you extra freedom of movement.

Weight: 355 g / 0.8 lb – size M  
Sizes: M, L, XL

# SPITFIRE® MK II

## modular cummerbund

Product SKU: PC-SPMC-CD5

MODULAR CUMMERBUND is one of the accessory cummerbunds designed mainly for the SPITFIRE® MK II system.

This modular cummerbund is based on the classic one from the SPITFIRE® carrier. Made of proprietary laminate with a laser cut modular system on the surface. The inner side is made of an elastic softshell fabric, not only to provide additional comfort, but also to create, together with the external part, a flat, velcro-closed pocket that can accommodate not only some flat essentials, but also additional armor panels.

Partially elastic construction of the cummerbund provides additional freedom of movement. This cummerbund is compatible with all our plate carriers: SPITFIRE®, SPITFIRE® MK II and HELLCAT®.

## SPITFIRE® MK II

### elastic cummerbund

Product SKU: **PC-SPEC-ELW**

With our new SPITFIRE® MK II Plate Carrier, you are no longer forced to accept what you get, but you can actually build your own perfect carrier. Therefore, we've decided to create various cummerbunds. One of them is the SPITFIRE MK II Elastic Cummerbund®. The cummerbund is made entirely of 100 mm/4" elastic webbing divided into sections. Each section can accommodate a single carbine magazine (AR/AK/SR or even for G36). To make reholstering easier, each section is equipped with laminate pullers, that can also be used for attaching a bungee cord, providing even more security for the mags. This cummerbund is also compatible with our standard SPITFIRE® vest as well as the HELLCAT® plate carrier.

## SPITFIRE® MK II

### rapid access cummerbund

Product SKU: **PC-SPRC-CD5**

SPITFIRE® MK II Rapid Access Cummerbund based on our standard modular cummerbund, it features quick release ROC buckles. Even though the cummerbund is attached to the front of the carrier just like the standard one, to open or close it, you no longer need to open the front flap - you just pull the cord pullers to open the buckle or you slide the buckle down to close it. The external surface is made of proprietary laminate, covered with a laser cut modular system compatible with MOLLE/PALS. The internal part is made of elastic nylon, which, with the external part, creates a Velcro® closed pocket for flat essentials or additional armor panels. This cummerbund is partially elastic for enhanced freedom of movement. The cummerbund is compatible with SPITFIRE® and SPITFIRE® MK II and the HELLCAT®.

## SPITFIRE® MK II

## modular cummerbund slim Product SKU: PC-SPMS-CD5

What makes a platform truly modular is the possibility to build it according to your needs, by using various flaps, back panels or cummerbunds. The SPITFIRE MK II MODULAR CUMMERBUND SLIM is one of these options. Designed to be minimalistic and fully MOLLE/PALS compatible, this cummerbund is covered with laser cut modular system that allows you to mount a variety of pouches that you may need. The cummerbund itself is made of a single layer of proprietary laminate, making it not only lightweight, but also much more breathable. Partially elastic construction of the cummerbund provides enhanced freedom of movement. The cummerbund is compatible with the SPITFIRE®, SPITFIRE® MK II and HELLCAT® plate carriers.

## UNDERPOUCH

## light

Product SKU: PO-UPLT-CD5

A lightweight and universal pouch made of durable Cordura® 500D, the Underpouch Light is a great addition to any plate carrier. It consists of three pockets: the main one is zippered and partially lined with soft Velcro® velour; the front, made of 4-way elastic nylon, and the rear, designed for a soft ballistic insert. Thanks to the latter, the Underpouch Light, when used with soft ballistic insert, provides a slight protection of the lower abdomen. At the bottom of the pouch there is one row of the skeletonized modular system and two metal grommets. They both can be used to carry a tourniquet right under the pouch. The pocket is attached to any plate carrier, right under the front flap via Velcro®.

## SPITFIRE® MK II

### underpouch

Product SKU: **PC-SPUP-CD5**

The biggest issue when you carry a plate carrier and a belt is that sometimes you just lack the option to mount anything on the front. Therefore, while making the SPITFIRE® MK II, we've decided to make this pouch to be mounted directly onto the front loop panel of the plate carrier and hang down, right under the plate. The pouch can fit all your essentials like a small rain jacket, cellphone, spare ear plugs, pistol mags or even an insert from one of our MED pouches. The front has a large loop panel for patches, as well as a piece of the laser cut modular system. Made mainly of Cordura® 500D fabric, it is lightweight yet durable. This pouch is a perfect addition not only to your heavier configuration, but also for the smaller CQB sets, when you want to place everything in front.

RGR

SGR

Weight: 660 g / 1.5 lb

The SPITFIRE® breacher panel is one of the back panels designated for our top of the line, fully-customizable plate carrier. The design allows rapid reconfiguration for any mission by attaching a prefabricated panel to the rear of the SPITFIRE® and SPITFIRE® MK II plate carriers or onto the HALIFAX® backpack.

The breacher panel pouch layout is the result of our experience and end-user feedback of the SPITFIRE ASSAULT PANLE®. The top portion has four buckled pouches for flashbangs (or any standard NFDD's), with MOLLE/PALS columns on its sides. A large, zippered pocket is mounted at the bottom part of the panel. The large pouch is lined with soft, velour fabric and can be used to carry scratch sensitive objects, like eye protection, NVGs, binos, etc. Between the flashbang pouches and the utility pouch there is one additional, horizontal MOLLE/PALS column designed for mounting a breaching charge pouch.

The whole panel is also a large, flat pocket for a hydration bladder or breaching tools, with the possibility of carrying longer tools, like a sledge hammer, through the Velcro®-closed bottom of the panel. Even though the panel was designed for very specific purposes, it remains incredibly versatile.

## SPITFIRE® MK II

### chest rig interface

Product SKU: PC-SPCI-CD5

The SPITFIRE® MK II Plate Carrier is truly a unique platform. It can not only be a standard carrier, but with the SPITFIRE MK II CHEST RIG INTERFACE®, it can be transformed into a front plate only carrier. The INTERFACE consists of the shoulder piece and small, modular side panels, all made mainly of proprietary laminate. It is perfect for the recon operations when you want to fight light, but at the same time you need at least minimum ballistic protection. Additionally, the interface makes the SPITFIRE® work much better with backpacks.

Weight: 210 g / 0.5 lb

## SPITFIRE®

### cutaway system

Product SKU: PC-SPQR-PEN

This parachute-type retrofit system allows for immediate release and field reassemble of the SPITFIRE® and SPITFIRE® MK II plate carrier without cutaway elements. Created mainly with waterborne ops in mind, it also allows for instant assessment, treating and re-armoring of the wounded teammate. Made of durable polyethylene it won't break or fail even under heavy load. The construction of the system also allows single side use, which is useful when you route your communication cables, antennas etc on one of your shoulders.

Weight: 115 g / 0.3 lb – size M  
 Sizes: M, L, XL

# SPITFIRE®

## comfort pad set

Product SKU: **PC-SPCP-NLN**

Comfort Pad Set for the SPITFIRE® plate carrier was designed to add comfort, improve air flow and moisture management while wearing your hard armor. The kit comprises six pads: two worn under front plate, two under rear plate and two for the shoulder straps, attached to the matching velour strips on the plate carrier. Made of soft, yet durable softshell fabric for durability and breathability. Soft foam used for padding won't crush even under heavy load.

## MOLLE wing

Product SKU: **PL-SPMW-CD5**

MOLLE Wing was developed to work with the SPITFIRE®, SPITFIRE® MK II and HELLCAT® plate carriers side ports. It enables attachment of additional magazine pouches or other auxiliary equipment right next to the plate, with the cummerbund wrapping over it, to save some real estate on the plate carrier itself. Made of proprietary laminate, the wing is covered with a MOLLE/PALS compatible modular system. When mounted it extends the attachment area by 2 x 3 (2 columns x 3 rows).

## SKELETONIZED

### comms wing set

Product SKU: **PO-SKCW-CD5**

On the modern battlefield, communication is key and as important as your firepower or ballistic protection. The Skeletonized Comms Wings Set is a set of two side wings for the plate carrier that can accommodate most of the individual radios, including AN/PRC-148 or AN/PRC-152. Each wing is height-adjustable to fit various radio configuration (with or without battery etc). Even more - wings can also accommodate 2 AR-style magazines. Laser cut holes on the front were carefully designed to work with the side buckles of Front Flap Rig Interface.

## SPITFIRE®

### comms wing

Product SKU: **PL-SPCW-CD5**

SPITFIRE® Comms Wing was developed as an additional pouch to work mainly with the SPITFIRE® Plate Carrier side ports. It enables attachment of a personal radio right next to the plate, with the cummerbund wrapping over it, allowing you to save some real estate on the plate carrier itself. This laminate pouch is height-adjustable and with the elastic sides will accommodate various radio models. It has an elastic loop closure to prevent losing its contents. The pouch is compatible with the SPITFIRE®, SPITFIRE® MK II and HELLCAT® plate carriers.

## side sapi mount

Product SKU: PC-SPSM-CD5

SPITFIRE SIDE SAPI MOUNT® is a two-piece interface that enables you to carry side protective plates in a SPITFIRE® MK I Plate Carrier and some SPITFIRE® MK II accessory cummerbunds. Fully versatile, conforms the most popular side plate sizes of 6x6" and 6x8". Made of proprietary laminate for durability, this interface can be attached to the cummerbund within just a few seconds, and, when not needed, tucked into the internal pouch of the cummerbund without the need of dismantling.

## TYPHOON®

### chest rig

Product SKU: **CR-TPHN-CD5**

TYPHOON®, most recent addition to our Chest Rig lineup, offers the largest attachment surface while still keeping the rig compact. Made of laminate, its laser-cut slots serve as a MOLLE/PALS compatible attachment interface. Due to its design, the user can employ either the main panel alone, add an extra chest panel or by means of an included attachment piece, carry the front ballistic plate inside the chest rig. Large mounting surface makes the TYPHOON® an ideal choice for greenside operations.

## WARWICK®

### mini chest rig

Product SKU: **CR-WRWM-CD5**

The smallest of the WARWICK® chest rig series. Made of proprietary laminate, this rig is covered with a laser-cut MOLLE/PALS compatible modular system. This rig is a base, modular platform, so it lacks any additional ammo or utility pouches on its surface, which makes it as flat and lightweight as possible. A flat, Velcro® closed internal pocket can hold your map, target photos or any other small, flat object. The rig can be attached directly to one of our plate carriers.

# THUNDERBOLT®

## compact chest rig

Product SKU: CR-TDBT-CD5

THUNDERBOLT® is a combination of DIRECT ACTION's® two most appreciated chest rigs with additional feedback from our end-users.

This small, yet versatile rig has most of the pouches from the popular HURRICANE® hybrid chest rig applied to a platform even smaller than the TIGER MOTH®. With fixed pouches for carbine and pistol magazines, first aid kit and other essentials, it gives you the capability of carrying everything as close to your body as possible. Detachable shoulder straps have laser cut holes for attaching PTT's. Horizontal MOLLE/PALS row under the pouch section can be used for mounting additional utility pouches.

Made of proprietary laminate and Cordura® 500D fabric for enhanced durability. Fully compatible with our chest rig interface, it can be attached to the SPITFIRE® and HELLCAT® plate carriers to create a rapid deployment platform.

## HURRICANE®

### hybrid chest rig

Product SKU: **CR-HRCN-CD5**

As in the RAF during the Battle of Britain, our HURRICANE® is the workhorse of our chest rig line. This split front, full size, hybrid chest rig has fixed, integral magazine pouches for maximum weight reduction along with partial modularity for versatility. The variety of sewn on pouches allow you to carry most of your essentials with you. Additionally each panel offers a Velcro® closed pocket for flat objects like maps, target photos etc. The tight split front design allows for comfortable use in stand-alone mode - and keeps your magazines close when attached to a plate carrier. The rig is made mostly of proprietary laminate for durability. Due to the detachable, fully modular shoulder straps, the HURRICANE® can be attached directly to one of our plate carriers.

## SNIPER PANEL

### additional front panel

Product SKU: **CR-SNPL-CD5**

Additional front panel for our zip-front chest rigs designed mainly for snipers. The biggest advantage of using this panel is that it moves the chest rig sides out of the front, leaving only a flat surface for a comfortable prone shooting position. The external layer of the SNIPER Panel is made of Cordura® 500D fabric to provide proper durability, even during prolonged use. Additionally the panel has a zippered pocket for flat objects like maps, target photos etc. To provide additional breathability, the internal part of the panel is made of mesh. The panel attaches or detaches quickly via top buckles and zipper. Compatible with the HURRICANE®, TEMPEST® and WARWICK® ZIP FRONT rigs.

## modular rescue/gun belt

Product SKU: **BT-WRHM-NLW**

WARHAWK® Modular Rescue/Gun Belt is a new version of our standard WARHAWK® belt. The two major changes compared to the classic models are the use of AustriAlpin® Cobra D-Ring buckle, compatible with various carabiners including FROG® buckles. The second one is a minimalistic modular system on its surface. Even though the belt is still made of 45 mm wide rigid webbing, we were able to place a specially designed system that works the same way as traditional 2 rows of MOLLE/PALS compatible webbing. Thanks to that, you are able to mount on one belt not only the holster, but also any modular or belt mountable pouch. This makes the WARHAWK® Modular a perfect choice for anyone who wants modularity, but at the same time doesn't want a large, bulky belt sleeve.

## nautic rescue/gun belt

Product SKU: **BT-WRHN-NLW**

WARHAWK® NAUTIC is a specially designed version of our standard WARHAWK® RESCUE/GUN belt, made for those dealing with waterborne operations. Due to the fact that the standard Cobra® buckles are not recommended to be used in salt water, we've decided to change it to an AustriAlpin® Cobra Nautic buckle. Made entirely of steel, this buckle is not only resistant to rust, but will work even after prolonged use in salty environments. Except the buckle, the rest of the construction is the same as the standard WARHAWK belt. The belt is made of rigid, 45 mm webbing, lined with loop Velcro®. On front part, near the buckle, the belt has reinforced and stiffened anchor point for carabiners, FROG® buckles etc. Reinforced seams on the key areas will last for years.

## low vis belt sleeve

Product SKU: **BT-FRFL-CD5**

The FIREFLY® low vis belt sleeve is designed either as an addition to the HELLCAT® plate carrier or as a stand-alone item. Made especially as a slick platform for undercover or covert use, it can also be carried as an outer belt sleeve in places, where the risk of snagging must be as low as possible like e.g. busses, trains etc. Stiffened, yet very slim, it's designated to be mounted on any 45 mm wide belt. The FIREFLY® has fixed, elastic pouches for pistol and carbine mags on the left side, a radio pouch on the right (can also be used for an additional carbine magazine), a first aid kit pocket on the back, and a TQ pouch on the right. Additionally, on the right side of the sleeve, there is a possibility to attach an OWB (outside the waistband) pistol holster, either via popular paddle-style, or belt loops. The FIREFLY® is compatible with our inner belt thanks to its Velcro® velour lining. The profiled construction makes the belt comfortable even during prolonged wear in vehicles.

## HORNET®

Sizes: M 84 cm | 33"  
L 92 cm | 36.2"  
XL 100 cm | 39.4"

## skeletonized belt sleeve

Product SKU: **BT-HRNT-CD5**

On the modern battlefield the weight of your equipment is one of the most important issues. This is why we've decided to reduce it even more by creating a new, skeletonized modular system. The HORNET Skeletonized Belt Sleeve is a modular platform fully compatible with MOLLE/PALS. Vertical cuts on the sides allow you to weave out the main belt and mount your holster directly on the gun belt. The anatomically contoured shape and the thin, soft padding of the sleeve distributes the weight of the carried equipment properly and increases comfort during long hours of work. The sleeve is equipped with four anchor points for shoulder straps and additional loops to which you can attach your gloves, lighthsticks etc. The sleeve works with the Inner Belt and most belts up to 45 mm wide, including the MUSTANG® and WARHAWK®.

Weight: 172 g / 0.4 lb – size M

## MOSQUITO®

Sizes:

S	80-90 cm   31"-35"

## modular belt sleeve

Product SKU: **BT-MQMS-CD5**

MOSQUITO® modular belt system is an extremely versatile platform - just like de Havilland's 'Wooden Wonder' from WWII. It works well in both low-profile and heavy-load configurations. This profiled, stiffened modular belt sleeve will accept most gun belts (up to 45 mm wide). The external layer is made of proprietary laminate and is covered with a laser cut modular system compatible with MOLLE/PALS. The vertical slits on the sides of the sleeve allow you to weave outside the belt to mount any OWB holster. It is compatible with accessory hip and drop leg panels. Thanks to the soft velour on the inner side, the belt sleeve is also compatible with our Inner Belt, while four heavy duty, plastic loops in the top portion allow you to mount to our Y- or H-Harness. The versatile construction of the MOSQUITO® belt sleeve makes it a perfect choice for all kind of operations, including CQB or RECCEE.

Weight: 254 g / 0,6 lb – size M

## MOSQUITO®

## Y-harness

Product SKU: **HS-MQYH-CD5**

The MOSQUITO® Y-Harness are lightweight, minimalistic suspenders that were designed mainly for the MOSQUITO® Modular Belt Sleeve. The harness makes your equipment more stable and easy to carry, thanks to re-distributing part of the load on your shoulders. Made mainly of proprietary laminate, partially elastic construction and a low profile design makes them comfortable for use under any armor carriers. On the front part there are laser cut holes that allow you to mount PTT's etc.

Weight: 83 g / 0.2 lb

## MOSQUITO®

### H-harness

Product SKU: **HS-MQHH-CD5**

At Direct Action® we have years of experience in manufacturing advanced special-ops equipment, but our most demanding clients have also been able to take advantage of customised solutions reflecting their specific needs.

**CUSTOM**

## OUR CUSTOM SERVICE

Our CUSTOM service is intended to meet the various specialised demands of our customers worldwide. We pride ourselves in having first-hand experience in special operations, which positions us perfectly to address the needs and issues encountered in real-life missions. While this expertise is part of the regular designing and manufacturing process, the CUSTOM service takes our flexible approach, our care for the detail, and our devotion to the end user's operating comfort to a next level.

True to Direct Action® motto, "From Specials to Specials", the service is targeted primarily at highly specialised users who know exactly what they need. We begin by sitting together with the customer for detailed consultations covering the purpose, the need and the range of the proposed modifications and then we deploy our team to work. This way, Direct Action® can stand up to the most demanding challenges. Naturally, custom solutions demand time and effort, so terms and conditions will be agreed on a case-by-case basis.

Ammunition is one of the most important things on any battlefield, as without it, your weapon won't go boom! Comfortable and secure carry of your magazines is essential so our whole range of ammo pouches is designed to fit any type of mission including dynamic assaults, long reconnaissance patrols or even covert urban operations.

## LOW PROFILE

### carbine pouch®

Product SKU: **PO-CBLP-CD5**

With this pouch, you are able to carry a carbine magazine concealed under your clothing. The mostly elastic, partially rigid construction provides a fast draw of the magazines, while the integrated pull tab assists with reholstering. Thanks to the use of proprietary laminate, the pouch is highly durable and won't be easily damaged even when used with metal magazines. The pouch rides high on your belt, so it won't be visible from under your jacket, providing comfort even during prolonged periods of time seated in a vehicle. The pouch is always flat, with or without magazines, to prevent any snagging while operating in close quarters. Our new Velcro® based system for belt mounting gives you the availability to attach or remove the pouch from your belt as needed.

## SLICK

### pistol pouch®

Product SKU: **PO-PTSL-CD5**

After the success of our low profile line of pouches, we've decided to create some slightly similar products, but this time with the possibility to mount them on any modular platform compatible with MOLLE/PALS. The SLICK PISTOL MAG POUCH is one of these pouches, suitable to fit two of the common double stack magazines. The pouch is made of proprietary laminate and wide elastic webbing to maintain a slick surface and remain flat when empty. These pouches are perfect whenever you would need your gear as clear as possible, without any unnecessary bulk that can snag onto the environment. The pouch is not only compatible with any MOLLE/PALS modular platform, but also, due to specially designed paracord loops, it can be mounted on any 45 mm wide gun belt.

## SLICK

### carbine pouch®

Product SKU: **PO-RFSL-CD5**

SLICK CARBINE MAG POUCH is one of the pouches based on the successful line of our Low Profile series. Designed to be mounted on any MOLLE/PALS compatible surface, as well as any belt up to 45 mm wide, this pouch will fit one AR/AK magazine. Partially elastic construction will hold the magazine securely, and at the same time will stay flat when empty. Made of proprietary laminate, it won't get damaged even if used with metal magazines. This pouch is perfect whenever you would need your gear as slick as possible, without any unnecessary bulk that can snag onto the environment. The pouch is not only compatible with any MOLLE/PALS modular platform, but also, due to specially designed paracord loops, it can be mounted on any 45 mm wide gun belt.

## SPEED RELOAD

### rifle pouch short®

Product SKU: **PO-RFSS-CD5**

Shorter version of our open top rifle magazine pouch - the Speed Reload Rifle Pouch Short. The pouch allows you to reload rapidly, while ensuring their safe carrying. The Hypalon® inside and adjustable tension, prevents the magazine from falling out, even if they get snagged. The Rifle Speed Reload Pouch Short positions the magazine higher, providing a larger gripping surface. Works perfectly with belts and sleeves. Thanks to the use of the MOLLE/PALS system and specially designed paracord loops, it is possible to mount it on any belt up to a width of 45 mm. Laser cut modular system on the front of the pouch give you the ability to stack pouches one on another. The pouch allows you to carry most rifle magazines, including AR/AK/SR platforms.

## MED POUCH

### vertical MK II®

Product SKU: PO-MDV2-CD5

Slightly modified version of our MED POUCH VERTICAL. The biggest change is the more visible MED sign on the front that is laser cut in the loop Velcro®, which allows adding various patches, including IR signs. The insert was modified to reduce the weight and bulk. The med pouch itself still has it's most important features known from the previous version. This two piece IFAK is designed to fit on a chest rig side panel or on a belt - taking similar PALS real estate as a magazine pouch. Made mainly of proprietary laminate and 500D Cordura®. The insert with medical equipment can be deployed with single pull of the Velcro®-closed flap. The whole first aid equipment is well planned and held in place by elastic webbing loops. The interior of the main pouch is covered with loop Velcro® which allows you to mount our SHEARS pouch inside. The pouch is not only compatible with any MOLLE/PALS modular platform, but also can be mounted on any 45 mm wide gun belt.

Weight: 150 g / 0.3 lb

## COMBAT

### stretcher®

Product SKU: PO-CSTR-NLN

Lightweight foldable field stretcher. Made of a double layer of Nylon Micro Rip-Stop fabric to guarantee durability and remain lightweight. Eight reinforced webbing carry handles (four to a side) allow you to equally distribute the weight of a wounded teammate. Handles can also be used to insert carrying poles for easy, two-man use. Two integrated Velcro® closed flat pockets, each the size of one half of the stretcher allow you to gather the wounded soldiers belonging or to use the stretcher as an improvised SSE bag. Stow pouch for folded stretcher is not only compatible with any MOLLE/PALS compatible surface, but also, due to the specially designed paracord loops, can be mounted on any 45 mm belt.

Weight: 300 g / 0.7 lb

## TOURNIQUET

### pouch®

Product SKU: **PO-TNQT-CD5**

Marked with a laser engraved "TQ" for easy identification, this pocket is made to carry most of the currently used tourniquet models such as SOFTT-W or CAT. The key idea of the closed pouch is to provide quick access to the tourniquet and a more sturdy carry method than rubber bands, with additional protection of the tourniquet against dirt or mud, which can cause it to fail at the least desirable moment. The pouch is not only compatible with a MOLLE/PALS modular system, but also, due to specially designed paracord loops, it can also be mounted onto any 45 mm gun belt. Even more, thanks to Velcro® strips on the back, the pouch can be easily attached not only vertically, but also horizontally.

## SLICK

### radio pouch®

Product SKU: **PO-RDSL-CD5**

SLICK RADIO POUCH is a result of the users feedback regarding our low profile pouches. The idea of the SLICK RADIO POUCH was to make as small and bulk-less pouch as possible, without compromising its features. The pouch can fit all medium size individual communication devices. The pouch is partially elastic and height adjustable to fit various models and to hold them firmly. Designed mainly for CQB operations, where having a slick equipment is essential.

# JTAC

## admin pouch®

Product SKU: **PO-JTAC-CD5**

JTAC Admin Pouch is a compact solution to carry your smartphone, map, notepad etc during any field operations. Zippered and partially stiffened main compartment has a clam-shell style opening with the cord limiters that prevent your gear from falling out. Internal pocket is designed mainly for included map case, but will easily hold any small notepad. Additionally inside there are loops for dummy cording and elastic loops for a sharpie. Front Velcro® panel combined with a MOLLE/PALS system can be used for an IFF patch or flag. Made of proprietary 500D Cordura® and proprietary laminate for durability.

Weight: 180 g / 0.4 lb

If you empty your mag, it's not great practice to just drop it on the ground, and this is why our compact, yet spacious dump pouches will easily retain your spent magazines or used flashbangs in order to be reused in the future. Available in various designs and sizes to fit every mission type!

## LOW PROFILE

### dump pouch®

Product SKU: **PO-DPLP-NLN**

If you don't want to stash your empty mags in the pockets of your jacket or you need a place to put some items that you find during a search – we've got you covered. Our LOW PROFILE DUMP POUCH® is a flat, compact pocket, that you can easily attach to your belt and deploy in the blink of an eye. The bag will easily fit a few carbine or pistol mags, or even a full size pistol. Stiffened, rubberized handle provides you the ease of use and deployment, even without looking at the pouch. Our new Velcro® based system for belt mounting allows you to attach or remove the pouch from your belt whenever you need it. The pouch is partially stiffened, made of ultralight materials so it won't add any unnecessary weight to your gear.

## SLICK

### dump pouch®

Product SKU: **PO-DPSL-NLN**

SLICK DUMP POUCH is a versatile construction based on the successful Low Profile series. The idea of this dump pouch was to make it as compact as possible, but still large enough to fit few carbine and pistol magazines. The external construction is made of elastic webbing, to keep the pouch flat when not needed. The stiffened, anti slip handle gives you the ability to deploy the bag with just one pull. Even though the bag is made of ultralight nylon fabric, it is extremely durable and won't get damaged even when used with sharp, metal magazines. The pouch is perfect for CQB operations, when the gear should be as slick as possible to avoid snagging onto the environment. The pouch can also be used as an emergency pouch for stashing evidence during a search. The pouch is not only compatible with any MOLLE/PALS modular platform, but also, due to specially designed paracord loops, it can be mounted on any 45 mm wide gun belt.

## PADDED

### carbine sling®

Product SKU: **SL-CRBP-NLW**

PADDED Carbine Sling is yet another example of the constant evolution of Direct Action gear. This carbine sling is based on our standard product, but this time made especially for the heavier weapons or for long patrols. Padded part is made of 3 mm thick EVA foam covered with a softshell fabric that protects your skin from any abrasions. The sling can be easily transformed from a two point sling into a single-point sling. The sling is made of highly durable 1" wide nylon webbing that will withstand years of use even in the harshest conditions. The length of the sling can be quickly and easily adjusted via the antislip Hypalon® puller. The sling can be mounted to almost any type of weapon via webbing or with the highly durable paracord loops.

## BACKPACKS AND BAGS

ASSAULT PACKS

COVERT PACKS

LIFESTYLE PACKS

MESSENGER BAGS

DEPLOYMENT BAGS

The HALIFAX® medium backpack is a fully mission-configurable patrol pack. It features a large main compartment closed with YKK® #10 zippers.

The interior is lined with velour fabric for mounting of additional pouches. The back of the interior panel is also covered with laser cut MOLLE/PALS, to re-configure this pack for a medical pack, assault pack, breacher pack or even a radio pack using internal anchor points. The top part of the flap has two pockets, with one of them lined with velour. The outer layer of the back is covered with laser cut MOLLE/PALS.

Heavy duty shoulder straps will redistribute the weight of the carried gear. Additional anchor points on the bottom and sides, along with reinforced construction of the whole pack make it “jumpable” for airborne operations. Zippers on the front, the same as on the rear panel of SPITFIRE®, allow mounting any of our back panels, making the HALIFAX® even more scalable.

Weight: 2000 g / 4.4 lb

# DRAGONFLY®

## low profile gun pack

Product SKU: BP-DGFL-CD5

During undercover operations you may need some extra firepower. Concealing your carbine can be difficult, but our DRAGONFLY® is the solution to this problem.

Externally, it looks like a plain civilian backpack but as you unzip it, you have immediate access to your gun. It fits a stripped down 10.5" barrel AR, MP5 with collapsible stock, UMP etc.

The interior is lined with the Velcro® velour fabric for personalization. Shoulder straps can be hidden, transforming it into a handheld briefcase, that imitates large laptop case. The pack is made mainly of the Cordura® 500D fabric to withstand the use even in a harshest conditions.

BLK

SGR

Weight: 945 g / 2.1 lb

Capacity: 13,5 l / 824 cu in

Dimension: 54 x 36 x 7 cm / 21 x 14 x 3 in

The DRAGON EGG ENLARGED backpack is slightly bigger, 30-liter version of one of our bestsellers - the Dragon Egg backpack. The new version will prove itself not only in everyday use, but also can be easily adapted as a 3-day patrol pack.

The backpack is made of a combination of Cordura® 500D and laser cut laminate. The backpack has two pockets for the hydration system - one internal and one external, zippered in the back part. The back pocket, thanks to the use of soft foam, can also be used to carry tablets or up to 15 " laptops. Inside the main compartment there is a zippered mesh pocket for small items. The front compartment is equipped with an organizer that allows you to organize your equipment, including small radios.

On the sides of the backpack there are pockets for water bottles or small items. At the front, the backpack has an additional, small pocket lined with soft velor, allowing you to safely carry sunglasses without fear of getting them scratched. On the front there is also a soft Velcro® for easy personalization. The front, sides of the backpack and the waist belt are partially covered with a laser cut modular system, compatible with MOLLE/PALS.

The dragging handle of the backpack is made of paracord. In an emergency, this handle can be untangled, giving us a total of 5.5 m of line. Profiled shoulder straps and a removable hip belt guarantee stable carrying of the backpack, even during dynamic activities.

Weight: 2190 g / 4.8 lb

Capacity: 30 l / 1830 cu in

MCM

PWW

SGR

Direct Action® Dragon Egg® is 25-liter capacity backpack for either short patrol duties or EDC use.

The pack features two hydration bladder pockets, one in the main compartment and an additional in the zipped back part. The rear pocket, thanks to a padded sleeve, can be used for safely carrying multiband radio devices or notebook (15"). Front pocket of the Direct Action® Dragon Egg® features a zippered mesh pocket and simple organizer for small essentials. Additional side pockets can carry small and flat items, while also expanding to be able to fit a standard U.S. canteen.

Laser-cut system compatible with MOLLE/PALS makes the backpack not only fully modular, but also still maintains a low profile look. Thanks to the egg shape, the pack has a smaller height and width than other packs with similar capacity and makes it more comfortable with belt kits or ballistic vests.

Suspension system is based on comfortable shoulder straps and an internal stiffener in the back. Made of durable 500D Cordura® nylon fabric with water resistant coating. Combat Vent System®, the innovative ventilation system used in backpacks, provides increased comfort for their users. Made of contoured foam profiles with multiple air channels that are combined with airy mesh, CVS® keeps the pack off the back, which enhances air circulation preventing heat build-up and sweating, while the stiff foam ensures comfort and stability.

Weight: 1620 g / 3.6 lb  
Capacity: 25 l / 1526 cu in  
Dimension: 48 x 27 x 18 cm / 19 x 10.6 x 7 in

Ghost® is a 30+ liter backpack, scalable and well suited for the role of a tactical 3-day pack.

The main pack features two zippered compartments - first, the larger has an internal hydration sleeve and an accessory mesh pocket. The second, accessible from the back side of the pack is reinforced and will hold a large laptop. Third pocket of the Ghost® platform is a detachable organizer pocket, completely separable from the main pack body. Normally, it is attached to the main pack via 4 buckles and an adjustable shockcord, but it may be used completely on its own (it has its own carrying handle) for medical supplies etc.

Internally this outer pocket has a lot of internal slots and pockets for gear organization, plus when attached to the Ghost® main pack it forms a beavertail-type flap, where you can pack additional clothing or lighter gear. Externally, there are 4 pockets & two side pockets that may be stretched to fit water bottles. Additionally, there is a zippered, soft velour lined, glasses pocket in the upper portion of the pack and a flat zippered pocket below it. Carrying straps of the Ghost® backpack are wide, and padded with stiffened closed cell foam, with side release buckles for quick doffing. Waistbelt of the Ghost® pack is a fully functional PALS/MOLLE belt that can be detached from the main body and used on its own with the included low-profile suspenders.

Weight: 2400 g / 5.3 lb

Capacity: 28 + 3,5 l / 1708 + 213 cu in

Dimension: 52 x 30 x 18 cm / 20,4 x 12 x 7 in

## DUST®

Weight: 1210 g / 2.7 lb  
Capacity: 20 l / 1220 cu in  
Dimension: 42 x 26 x 14 cm / 16.5 x 10 x 5.5 in

## backpack MK II

Product SKU: **BP-DUST-CD5**

Dust® is a small 20+ liters backpack oriented towards use as an EDC/1-day pack platform. It features two zippered compartments – main has an internal, padded laptop / hydration sleeve and an accessory mesh pocket. Smaller compartment has an internal organizer for notepads, GPS, writing utensils and other essentials, plus a clear vinyl pocket for maps and documents. Externally there are 3 flat pockets & two on the sides that can be stretched to fit water bottles. Side accessible flat pocket on the front surface is a good place to keep smaller items that need to be easily accessible without opening the packs compartments. Carrying straps and waistbelt of the Dust® backpack are adjustable and can be stowed away in the back panel, turning this pack into a slim, no-snag hand luggage.

On the modern battlefield the ballistic protection is just a must-have item no less important than camouflage. Therefore we've decided to create an advanced helmet cover for one of the most popular models on the market – the OpsCore® FAST helmet. Made of Cordura® fabric, proprietary laminate and elastic softshell fabric, this cover will fit not only the ballistic helmets but also the bump version, without interfering with its ventilation holes. The loop panels on top and back are also MOLLE/PALS compatible so that you are able to mount any cameras, IR strobes, counterweight etc. Side loop panels will allow for easy personalization with IR flags/IR markers. Front cut is made especially for NVG mounts.

## NECK GAITER FR

### combat dry light

Product SKU: **CP-NGFR-CDL**

Simple, yet surprisingly useful, this neck gaiter works great in a multitude of roles. It can be used to cover and protect your neck and face from flash fire, dust or wind - next minute you can turn it into cap, scarf, headband or goggle cover. Made of lightweight and highly breathable, flame retardant fabric.

Made of Polartec® PowerDry FR it's elastic and easy-fitting, though it always remains its size. It won't extend nor stretch. The Polartec® PowerDry FR is both lightweight and comfortable for the skin.

## BEANIE CAP FR

### combat dry light

Product SKU: **CP-BNFR-CDL**

Lightweight, breathable cap for use under the helmet or for standalone use. Made of flame retardant fabric, it will protect you from flash fire and short flame exposure. The cap is also good for running or just chilling.

Made of Polartec® PowerDry FR it's elastic and easy-fitting, though it always remains its size. It won't extend nor stretch. The Polartec® PowerDry FR is both lightweight and comfortable for the skin.

## BALACLAVA FR

### flame retardant

Product SKU: **CP-B1FR-CDL**

This classic balaclava design will protect your good looks against flash fire and short flame exposure. Stretchy and comfortable, yet it still provides a snug fit. The eye holes work well with most ballistic goggles and glasses. Its flat seams provide comfort even when used with helmets. This is a perfect choice to help protect your face and neck.

## HARD LEATHER

### gloves®

Product SKU: **GL-HARD-GLT**

New, improved version of the classic Direct Action® HARD GLOVES. The synthetic leather was replaced with genuine goat leather in order to provide great durability, weapon feel and fitting to your hand. Specially designed slits on the finger joints provide comfort, even during prolonged weapon use. All fingers are touch screen compatible. Hook&loop closed cuffs provide a reliable, tight fit to your wrist, and Hypalon® loop not only helps with donning and doffing of the gloves, but also can be used to hang the gloves on your equipment.

## LIGHT LEATHER

gloves®

Product SKU: **GL-LGHT-GLT**

Enhanced version of the classic Direct Action® LIGHT GLOVES made with genuine goat leather instead of artificial. The gloves not only maintain a modern look, but also, thanks to used fabrics, provide great fitting to your hand. Genuine leather used on the inner side guarantees an even higher durability and reliable grip. All fingers are touch screen compatible. Elastic, extended cuff provides a tight fit and additional protection to your wrist, and Hypalon® loop not only helps with donning and doffing of the gloves, but also can be used to hang the gloves on your equipment.

## HARD

gloves®

Product SKU: **GL-HARD-PES**

Direct Action® HARD GLOVES are perfect choice for everyone working with firearms. The gloves not only offer a modern look, but also, thanks to the fabrics used, provide a great fit to your hand. Synthetic leather used on the inner side guarantees a high durability and reliable grip, thanks to its antislip properties. Specially designed slits on the finger joints provide comfort, even during prolonged weapon use. The middle finger and thumb are touch screen compatible. Velcro® closed cuff provide a reliable, tight fit to your wrist, and Hypalon® loop not only helps with donning and doffing of the gloves, but also can be used to hang the gloves on your equipment.

## CROCODILE FR

gloves short®

Product SKU: **GL-CRFS-NMX**

Fire is one of the main dangers during dynamic operations, especially in CQB. Direct Action® NOMEX GLOVES are made made entirely of flame retardant materials, like genuine DuPont Nomex®, and goat leather. Reinforcement in key areas will protect your hands from damage, while a carefully selected leather thickness retains your trigger feel. The Short version goes just over your wrist with a hook & loop adjustable cuff.
